FORSEES RAPID FALL OF VERDUN

German Army Expert Explains Why Fortress is Bound to Surrender Soon.

(By the Sun News Service.)

London, July 4.—The fall of Verdun is a matter of a few days, according to a semi-official statement, obviously government inspired, which is printed throughout the German press.

The author, Maj. D. von Schreiber, gives a detailed strategic description of the attack intended to prove that the French resistance of over four months is nearing an end.

The article says, in part:

"The northeast front of the fortress zone of Verdun was marked by three great fortified works. And they were protected by the fortress of Douaumont, which was on the northeast wing of the whole front; by the Thiaumont field works, which lay in the middle, and by works on the Cote de Froide Terre, which were the key to the southwest wing and held the approach to the Meuse.

"After storming Fort Douaumont and the whole works of Vaux, which lay further south, an attack was made on the works of Thiaumont, which were captured by a victorious advance of the German troops. The capture of the enemy work itself was a great success, which was further increased by taking all the neighboring positions, which were not in a position to dominate their front.

"With the capture of the village of Fleury, the foremost German line now runs almost parallel to the section of the inner line of forts that passes through the works of Souville and Fort de Tavannes, separated from it by a few kilometers.

"A characteristic feature of the German attack before Verdun consists, therefore, in the fact that now the greater part of the outer line of forts in this section has been stormed, and the foremost German troops have come quite close to the inner line defense, most extraordinarily favorable conditions for the continuance of the battle have therefore been created."

Alaska's 1915 mineral production was valued at \$2,854,329.

Hotel Marie Antoinette

Broadway, 66th and 67th Sts. NEW YORK CITY

SITUATED in the most convenient location in town. Modern in every detail; absolutely fireproof; within ten minutes of the leading department stores, shops, theaters. Convenient to Pennsylvania and Grand Central depots.

15,000 MARCH IN LABOR PAGEANT

Many Picturesque Parades in Six Divisions Reviewed by President Wilson.

Fifteen thousand men, women and children of organized labor marched through the streets of Washington yesterday in a twin celebration. They were celebrating the birth of the nation and the dedication of the new home of the American Federation of Labor, at Ninth street and Massachusetts avenue northwest, where they were reviewed by President Wilson, President Samuel Gompers, of the Federation, and a notable gathering of statesmen, and high government officials.

Down through the streets the parade moved, column after column, in six divisions. American flag, labor flags, and banners everywhere. Every marcher wore a tiny American flag pinned to his breast with an "eight-hour-a-day" union button.

Those in charge of the parade strove to make it out-of-the-ordinary. And they succeeded. There were all sorts of diverting features. The union banners, for example, marched clad in white trousers, white sport shirts and without their coats, just as if they were all ready to call out, "you're next."

Paraders from the Iron Molders union, local No. 215, strode along carrying imitation "rammers" slung over their shoulders. They use real "rammers" in the shop, but real ones are heavy, and the day was hot.

Machinists in Parade.

The Columbia Lodge, International Association of Machinists, had a huge turnout in the parade. Its members stepped briskly along, each carrying a purple pennant. Just ahead of them marched the Pattern Makers' League of North America—another costumed brigade. Thousands of women were among the marchers, among them the women employees of the Bureau of Engraving and Printing, who were given a position well to the front in the parade. The division, and who were applauded all along the route. They marched, clad all in white, and stepped along with the precision of trained soldiers.

Their column was preceded by a huge banner, upheld by Mrs. Margaret Thompson, with two little girls, Anna Hutton and Katherine Weckel, clad in red, white and blue, as her aid. Immediately behind this trio marched a miniature Uncle Sam, bearded and dignified, who looked like a boy, but who, it developed, is in reality, a little girl, Agnes Hutton.

The men employees of the Bureau were headed by C. J. McCarthy and Dan Hassett. They were followed by the pipe printers, with John Deviney, president of the local, at their head. The men from the Government Printing Office were headed by Public Printer Ford Columbia. Typographical Union, No. 101, was represented with nearly 100 marchers. In addition to the men in line, the union converted a big sight-seeing automobile into a bedecked float.

Another float was fitted up by the Ladies' Auxiliary No. 101, of the Columbia Branch. It carried a big sign reading "First to give equal rights and equal pay to women workers."

Nearly All Branches There.

Practically every branch of organized labor in the city was represented, and in addition the various State federations and representatives. Men from thirty-five international labor organizations marched, as did representatives of twenty-two Central Labor Unions. Delegates from England and Mexico were also in line. Every section had a band. The parade started at 10 o'clock in the morning. Edward L. Tucker, president of the Central Labor Union, was grand marshal, with N. A. James and R. F. Brown as aides. The route lay along Pennsylvania avenue to Fifteenth street, thence north to K, thence east to Tenth, north on Tenth to Massachusetts avenue and thence southward past the reviewing stand which had been erected in front of the new labor home to Eighth street and Mount Vernon place. The marchers turned up Eighth

street to L, where they disbanded, and crowded back to the stand to witness the dedication ceremonies. It took about one hour for the parade to pass a given point.

QUANTICO PROVES POPULAR.

Quantico, Va., though new in the excursion field, is proving attractive to the people of Washington. In the past few days many have visited the new resort and enjoyed its many pleasures. In addition to good bathing and fine fishing, a new dancing pavilion has recently been built on the hilltop overlooking the river. The managers of the new resort propose to make it a popular playground and picnic resort for Sunday schools and other organizations. Those who desire to give excursions there should call at the office of the Steamer St. Johns, foot of Seventh street southwest.

Arrangements have been made to have the Steamer St. Johns stop at Quantico on all trips to and from Colonial Beach, except on the return trip Saturday nights. The steamer leaves here Saturdays at 2:30 p. m. and on other days, except Mondays, at 4 p. m. She stops at Quantico on the return trip and reaches here about 10:30 p. m.

No liquors are sold at Quantico. It is an ideal place for camping parties and free sites for camps are obtained by application to the Steamer St. Johns Company. Quantico is but two hours' run from Washington. Visitors to the resort have many hours in which to have an enjoyable time.

Niagara Falls

ROUND \$12.00 TRIP

Motor Gossip

By "ST" GROGAN.

"Standardization is the basis of all great success in the motor car industry," said H. B. Leary, Jr., Maxwell distributor, in discussing the remarkable price reduction announced this month by the Maxwell Motor Co. "The manufacturer today who wants to produce the very best values, the utmost in service and quality for a certain price must standardize every possible process of the work. There must be exacting standards by the week and week-end. Quality must be maintained to the highest degree.

"In producing the Maxwell car, the endeavor is to accomplish two things, namely, the perfection of the car and development of our manufacturing process to eliminate all waste in materials, labor and money.

"Every part is so made interchangeable. It must fit into its place without strain. It must be made so that the engineer can make sure of the design, the strength of the material used for each one is following this plan. Not perhaps lately to the standard which they have set for themselves. This is what is meant by the term standardization as applied to the manufacture of Maxwell cars.

"And if you will study the most successful concerns you will find that every one of them, and then adhere to it to such a great extent as is the case with the Maxwell Motor Company, but they realize that it is the right course, and are making progress in this direction."

"Standardization is the basis of all great success in the motor car industry," said H. B. Leary, Jr., Maxwell distributor, in discussing the remarkable price reduction announced this month by the Maxwell Motor Co. "The manufacturer today who wants to produce the very best values, the utmost in service and quality for a certain price must standardize every possible process of the work. There must be exacting standards by the week and week-end. Quality must be maintained to the highest degree.

"In producing the Maxwell car, the endeavor is to accomplish two things, namely, the perfection of the car and development of our manufacturing process to eliminate all waste in materials, labor and money.

"Every part is so made interchangeable. It must fit into its place without strain. It must be made so that the engineer can make sure of the design, the strength of the material used for each one is following this plan. Not perhaps lately to the standard which they have set for themselves. This is what is meant by the term standardization as applied to the manufacture of Maxwell cars.

"And if you will study the most successful concerns you will find that every one of them, and then adhere to it to such a great extent as is the case with the Maxwell Motor Company, but they realize that it is the right course, and are making progress in this direction."

Steamer and Dress Trunks

At Special Low Prices

The number of these trunks is limited, and it is a certainty that trunks of the caliber of these will not again be as low priced—at least not this season.

We secured the lot—a surplus, from one of our best makers—a maker who has been producing fine trunks for years, and who produces nothing but the best quality trunks at all times.

The prices at which we obtained these Trunks were so low that we can offer them to our patrons at one-third less than they would regularly be offered.

Dress Trunks; large, roomy and splendidly made in every particular; sturdy corners and reinforcements; cloth lined and fitted with two trays.

34-inch Trunks; special, \$12.
